"Area centred NH 315361: At the NE end of Isle Oronsay on level ground below a low escarpment at about 75ft(22.96m) OD there are at least 40 shielings in very ruinous condition and difficult to identify, the majority situated within an area of lazy-bed cultivation which probably accounts for thier condition. They are mainly of single-cell type, with a few double-cell examples, circular or oval on plan, measuring between 4.0 and 8.0m in diameter externally and averaging about 0.2m in height."(OSFI:CFW:9.6.1961) "NG 315 361 'Old Shielings'."(1)
