name								Allt nan Leac			
class								Settlement			

On the north side of the Allt nan Leac at the point where it forms a waterfall and vanishes underground, at 94 m O.D. is a small settlement consisting of:-

1. Long-house 10 m by 3.8 m over walls 1.0 m wide. A door opening faces SE.
2. To the SE is a small square structure with one end somewhat rounded which measures 3 m by 2 m over walls 1 m wide. A door faces the long-house.
3. To the SW the land falls away in a steep rocky slope at the foot of which is an enclosed field which measures 17 m by 12 m. A short length of wall protrudes from the north side of the pen, at the end of which is a boulder built pen.
