52 TEXT

"See over for text."

52.

Centred at NH 524632 on an almost level part of the hillside is a settlement of three hut circles, plus a probable hut ('A' - 'D').

'A' is a small heather-covered but measuring 8.5 m SE - NW x 7.0 m within a slight wall of 1.8 m average spread. The entrance is in the SE. At NH 5240 6324

'B' is noticeably larger and stronger built than 'A' being 13.0m SE - NW x 11.0 m within a wall of 2.5 m average spread, somewhat mutilated in the NW. An outer facing stone lies at the E side of the entrance in the SE.

At NH 5239 6332

'C' is 8.5 m E - W x 7.5 m within a wall of 2.0 m average spread. The entrance is in the E.

At NH 5235 6331

Immediately to the ENE of 'C' is an enclosure 'D' probably a hut circle though in a much poorer and rougher condition than 'C'. It measures approximately 9.9 m SE - NW x approximately 7.0 m within a wall of indeterminate width. Some probable facing stones lie to the S of the entrance, in the SE.

At NH 5236 6334
130 metres E of 'B' is a sub-rectangular feature
('X' on the field sheet) about 8.0 m in diameter within a turf-covered bank. Its condition is too amorphous for definite classification.

At NH 5253 6328

A few scattered clearance heaps are the only evidence of contemporary cultivation in the area.

(OSFI:JB:16.11.1976)
