"NH 8431 5328 Fort."

"A fort, overgrown with whin, straddling a glacial ridge running E to W. A bank, c.0.5m high, with outer ditch, c.0.3m deep, each c.3.0m wide, crosses the ridge in the E and W isolating a level sub-rectangular area measuring c.23.0m by c. 10.0m. The ditch continues round most of the N side as a terrace c.1.5m wide in the NW where it is best preserved, and at a maximum of c.3.5m below the summit. Nothing could be seen on the S side due to dense whin." (OSFI:RL:8.1.1970)
