Knock of Drumullie. Building

Slight foundations mark the outline of a structure shown on the 1st Edition Ordnance Survey. Predominantly U shaped, open to the south-east, this building is now grass covered with walls standing 0.3 m. The building is 20 m north-west to south-east and 15 m south-east to north-west. A hollow forms a yard within an open area between the building's footings.

Early Modern

1st Edition OS

The current management practices are appropriate for the ESA scheme.

The site does not appear to suffer from any serious detrimental circumstances which would make it suitable for Tier 2 prescriptions.
