**District:** Lochaber

Denuded Cairn with Burial Cist - Ballnashelich

40 NM 793 681

NM 76NE 003

This cairn is immediately east of the Bailey Bridge at the foot of Loch Doilet and is vulnerable because of its easy access from the public highway, and from possible road widening.

It is a good example of its type although there are no records of the contents of the cist.

The site is recorded as Item 12 in the R.C.A.H.M.S. Inventory Argyll 3 Mull, Coll, Tiree and North Argyll 1980.

The area to be scheduled would be about 10 m x 10 m.
